## What Are Robots?

Robots are machines that can perform tasks automatically or with minimal human control. They are often designed to mimic human actions or to do things that are challenging for humans. Robots can be simple, like a toy car that moves forward, or complex, like a robot used in space missions.

## Definition of Robots

A robot is a machine capable of carrying out a series of actions automatically, usually by following instructions from a computer program.

## Basic Parts of a Robot

Most robots have key components that help them operate:

- **Controller:** The "brain" of the robot, often a computer or microcontroller that gives commands.
- **Actuators:** These are motors or engines that move the robot's parts.
- **Sensors:** Devices that allow the robot to see, hear, or feel its environment.
- **Power Supply:** Usually batteries that give energy to the robot.

## Types of Robots

Robots come in many shapes and sizes, each designed for specific tasks. Here are some common types:

## 1. Industrial Robots

Industrial robots work in factories. They assemble cars, package products, and perform welding. They are very precise and can work for long hours without getting tired.

## 2. Service Robots

## 5. Humanoid Robots

Humanoid robots are designed to look and act like humans. They can walk, talk, and even recognize faces.

## How Do Robots Work?

Robots work based on programming and sensors. Here's how they typically operate:

### Step 1: Receiving Instructions

Robots get commands from a computer program. These instructions tell the robot what to do.

### Step 2: Using Sensors

Sensors help robots understand their environment. For example, a robot might use a camera to see objects or touch sensors to feel surfaces.

### Step 3: Moving and Acting

Based on the instructions and sensor data, robots move their parts using actuators. For example, a

robot arm might pick up an object.

## Step 4: Making Decisions

Advanced robots can analyze information and make decisions. For example, a robot vacuum might decide to avoid a bump or move around furniture.
