 - Write numbers 1 through 12 around the circle to mark hours.
 - Add minute markers if you wish to include minutes.
 - Use markers or stickers to create a colorful design or theme.

Step 2: Marking the Hours and Minutes

- Using a ruler and protractor, mark the positions of each hour around the circumference:
- Each hour mark is 30 degrees apart ($360^\circ \div 12$).
- For more precision, mark the minute positions:
- Each minute mark is 6 degrees apart ($360^\circ \div 60$).
- Label each hour with large numbers for clarity.

Step 3: Creating the Clock Hands

- Cut out two strips of paper for the hour and minute hands:

- The hour hand should be shorter (about one-third the radius of the clock face).
- The minute hand should be longer (about two-thirds the radius).

- Optional: Cut a third, very thin strip for the second hand.
- Decorate the hands with colors or designs for easy differentiation.
- Punch a small hole at one end of each hand?this is where they'll pivot.

Step 4: Assembling the Clock Mechanism

- Find the center of your clock face and punch a small hole at that point.
- Attach the clock hands:
 - Insert the brad fastener through the holes in the clock face and the clock hands.
 - Secure the fastener on the back, allowing the hands to rotate freely.

- Ensure the hands can move smoothly without obstruction.

Step 5: Adding Motion (Optional for Functionality)
