- Label each planet and learn interesting facts about them.

2. Make a Cratered Moon Simulation

Kids can simulate moon craters using flour and cocoa powder:

- Fill a tray with flour and level it.
- Sprinkle cocoa powder on top to create a dark surface.
- Drop small objects (like marbles) onto the surface to create craters.
- Discuss how impacts from space objects create craters on the Moon and other planets.

3. Create a Rocket from Recycled Materials

Encourage children to design and build their own rockets using:

- Plastic bottles
- Cardboard tubes
- Paper fins and nose cones
- Paint and stickers for decoration

This activity promotes creativity and introduces basic physics principles like thrust and aerodynamics.
