Understanding the Afghanistan Calendar: Origins and Structure

The Solar Hijri Calendar: Historical Roots

The Afghanistan calendar, officially known as the Solar Hijri calendar, is a solar calendar that begins from the Hijra—the migration of Prophet Muhammad from Mecca to Medina in 622 CE. Unlike the Islamic lunar calendar, which is based on lunar months, the Solar Hijri calendar aligns with the solar year, making it more consistent with the seasons and agricultural cycles in Afghanistan.

Historical Development

- The calendar's origins trace back to the Sassanian calendar, influenced heavily by Zoroastrian traditions.
- It was adapted and modified in Persia (Iran) before being adopted in Afghanistan, reflecting the region's historical ties.
- The current form was officially adopted in Afghanistan in the early 20th century, with reforms to standardize month lengths and start dates.

Structural Features

- The calendar comprises 12 months, with the first six months each having 31 days, the next five months 30 days, and the last month 29 days in a common year or 30 in a leap year.
- The year begins around March 21st, coinciding with the vernal equinox, known as Nowruz,

Afghanistan's traditional New Year.
