Question 1: List and explain the types of livestock commonly reared in Nigeria.

Answer:

The common types of livestock reared in Nigeria include cattle, sheep, goats, pigs, poultry, horses, and donkeys. Each type serves specific purposes such as meat, milk, draught power, and leather production.

- **Cattle:** These are primarily reared for meat (beef), milk, and leather. Breeds include local breeds like the Zebu and exotic breeds such as Friesian.
- **Sheep:** Raised mainly for meat (mutton) and wool. They are adaptable to various environments and are important for small-scale farmers.
- **Goats:** Kept for meat (chevon), milk, and skins. They are hardy animals suitable for arid areas.
- **Pigs:** Reared mainly for pork and breeding purposes. They require proper housing and feeding.
- **Poultry:** Chickens, ducks, and turkeys are reared for meat and eggs. They are quick to reproduce and provide quick returns.
- **Horses and Donkeys:** Used for transportation, draught power, and sometimes for meat.

Question 2: Describe the importance of good nutrition in animal husbandry.

Answer:

Good nutrition is vital in animal husbandry because it directly influences the growth, reproduction, milk production, and overall health of animals. Proper feeding ensures that animals are productive and resistant to diseases, leading to increased income for farmers. A balanced diet provides essential nutrients such as proteins, carbohydrates, fats, vitamins, and minerals necessary for physiological functions.

Question 3: What are the common signs of heat in breeding animals?

Answer:

Signs of heat include increased restlessness, mounting behavior, increased vocalization, swelling of the vulva, and clear mucus discharge. In cows, the signs may include licking the genital area and standing to be mounted. Recognizing these signs helps in timely breeding and enhances reproductive success.
