Understanding the Concept of Living and Nonliving Things

Before exploring the specifics of folder games, it's essential to understand the core concept they aim to teach.

What Are Living Things?

Living things, also known as organisms, exhibit characteristics that distinguish them from nonliving objects. These include:

- Growth and Development: Living things grow and change over time.
- Reproduction: They can produce offspring or new members of their species.
- Response to Stimuli: Living entities react to environmental changes (e.g., plants bending toward light).
- Metabolism: They carry out chemical processes to sustain life.
- Homeostasis: Maintenance of a stable internal environment.
- Cellular Structure: All living things are made up of one or more cells.

Common examples:

- Animals (dogs, birds, fish)
- Plants (trees, flowers, grasses)
- Microorganisms (bacteria, fungi)

What Are Nonliving Things?

Nonliving things do not exhibit the characteristics listed above. They do not grow, reproduce, respond actively, or undergo metabolic processes. They are inanimate objects or substances.

Examples include:

- Rocks
- Water
- Air
