This guide explores the building blocks of personality type within the DISC framework, offering a comprehensive look into how these elements shape individual behaviors, motivations, and interactions.

Introduction to DISC and Its Relevance

The DISC model was developed by psychologist William Moulton Marston in the 1920s. It categorizes personalities into four primary types based on tendencies and behavioral patterns:

- Dominance (D)
- Influence (I)
- Steadiness (S)
- Conscientiousness (C)

Each type represents a set of core traits that influence how individuals perceive the world, respond to challenges, and interact with others. Recognizing these building blocks is crucial for personal development, leadership, team building, and conflict resolution.

The Core Components of Personality in DISC

While the DISC model simplifies personality into four main types, each type is composed of several underlying building blocks or foundational traits that contribute to overall behavior.
