Sample System Workflow

To illustrate typical processes, consider the order placement workflow:

- Customer browses the menu and places an order via the interface.
- Waitstaff inputs order details into the system.
- The system records the order and sends instructions to the kitchen.
- Kitchen staff prepares the items; order status updates (e.g., "In Preparation," "Ready").
- Once completed, the staff generates the bill.
- Customer makes payment; the system updates the order status to "Completed."
- Inventory levels are adjusted accordingly.

Benefits of a Restaurant Management System

Implementing a RMS offers numerous advantages:

- Streamlined operations and reduced manual errors
- Faster order processing and improved customer service
- Accurate inventory tracking to minimize wastage
- Comprehensive reporting for better decision-making
- Enhanced staff management and scheduling
