What Is a Mind Map?

Definition and Core Principles

A mind map is a diagram that visually represents ideas, concepts, or information around a central theme. It uses branches, colors, images, and keywords to organize thoughts in a way that mimics the brain's natural associative thinking process. The core principles of a mind map include:

- Central Idea: The main topic is placed at the center.
- Branches: Main ideas radiate outward from the center.
- Keywords: Short, descriptive words or phrases are used to label branches.
- Colors and Images: Visual elements enhance memory and engagement.
- Connections: Related ideas are linked to show relationships.
