Sample Answer:

European explorers were driven by a combination of economic, political, religious, and technological motivations. Economically, the desire to find new trade routes to Asia to access spices, silk, and other valuable goods was paramount. Politically, nations sought to expand their influence and power through territorial acquisitions. Religiously, Europeans aimed to spread Christianity and counter the Muslim influence in trade routes. Technologically, advances such as the compass, astrolabe, and improved ship designs like the caravel made longer voyages feasible.

- Cons: Could include specific examples like the expeditions of Columbus or Vasco da Gama for more depth.

2. Describe the Columbian Exchange and its effects on the Old and New Worlds.

Sample Answer:

The Columbian Exchange refers to the widespread transfer of plants, animals, cultures, human populations, technology, and ideas between the Americas and the Old World following Columbus's voyages. This exchange introduced new crops such as potatoes, maize, and tomatoes to Europe, which significantly impacted European agriculture and diets. Conversely, Europeans brought horses, cattle, and wheat to the Americas, transforming indigenous societies. While the exchange facilitated global integration, it also led to devastating consequences like the spread of diseases such as smallpox, which decimated native populations.

The imposition of European culture, religion, and economic systems disrupted traditional ways of life. Many indigenous populations were decimated by diseases like smallpox, measles, and influenza, to which they had no immunity. Additionally, colonization often involved forced labor, land seizure, and cultural suppression, leading to long-lasting social and demographic changes.

Features:

- Pros: Emphasizes both military and biological impacts.
- Cons: Could include specific examples of resistance or adaptation by indigenous peoples.

4. What technological advances facilitated European exploration?

Several technological innovations played a vital role in enabling European exploration. The compass allowed navigators to determine direction accurately at sea. The astrolabe enabled sailors to measure latitude, improving navigation in open waters. Improvements in ship design, such as the development of the caravel, allowed ships to sail faster, farther, and with better maneuverability. Mapmaking also improved through more accurate charts, which reduced the risks of long voyages. These advances collectively opened new routes and made global exploration feasible.

Features:
