Strategies for Solving WileyPlus Exercise Questions

Analyzing the Problem Carefully

Before jumping into calculations, students should:

- Read the problem thoroughly to identify what is being asked
- Note key figures such as face value, interest rates, and payment schedules
- Determine whether the bond is issued at face, discount, or premium
- Identify relevant dates and periods for interest calculations

Applying the Appropriate Accounting Method

The most common methods used include:

- **Straight-Line Method:** Simplifies amortization but less accurate
- **Effective Interest Method:** Recognized as the standard approach, providing more precise interest expense calculations

Understanding when and how to apply each method is vital for correct exercise solutions.

Calculating Bond Issuance and Related Journal Entries

Typical steps involve:

- Determine the cash received from issuance based on market rate and face value
- Calculate the amount of discount or premium on bonds
- Record initial journal entries for bond issuance

For example, if bonds are issued at a premium, the journal entry would credit Bonds Payable and debit Cash and Premium on Bonds Payable.

Amortization of Discount or Premium

Amortization affects interest expense and carrying amount:

- Calculate interest expense using the effective interest rate
- Reduce or increase the bond's carrying amount accordingly
- Record periodic amortization entries

Common Types of WileyPlus Chapter 13 Exercises and Their Solutions

Issuance of Bonds at a Premium

Sample Exercise:

"Company issues bonds with a face value of \$100,000 at a 5% coupon rate, but market interest rate is 4%. Bonds are issued at a premium of \$3,000. Prepare the journal entries on issuance and first

interest payment."

Solution Outline:

- Record bond issuance:

Debit Cash \$103,000, Credit Bonds Payable \$100,000, Credit Premium on Bonds Payable \$3,000

- First interest payment (assuming semiannual):

Calculate interest expense using effective rate, amortize premium, and record interest payment accordingly

Bond Discount Amortization

Sample Exercise:

"Bonds with a face value of \$50,000 are issued at a discount of \$2,000. Using the effective interest method, compute interest expense for the first period."

Solution Steps:

- Determine effective interest rate from issuance data
- Compute interest expense:

Interest Expense = Carrying Amount × Effective Interest Rate

- Amortize discount:

Discount Amortized = Interest Expense - Cash Interest Paid

Retiring Bonds Early

Sample Exercise:

"A company retires bonds before maturity at a redemption price of \$105,000. The bonds have a book value of \$102,000. Record the journal entry for retirement."

Solution:

- Debit Bonds Payable for \$102,000
- Debit Loss on Retirement for \$3,000 (difference)

In the realm of accounting education, WileyPlus has established itself as an essential digital platform, offering students and instructors a dynamic environment for learning and assessment. Among its many features, the Chapter 13 exercises in the Intermediate Accounting course serve as vital tools for reinforcing complex concepts related to long-term liabilities, bonds payable, and associated accounting treatments. This article delves into the intricacies of WileyPlus Intermediate Accounting Chapter 13 exercise answers, providing a detailed, reader-friendly exploration of key topics, common challenges, and effective strategies to master these exercises.

Understanding the Significance of Chapter 13 in Intermediate Accounting

The Core Focus of Chapter 13

Chapter 13 typically centers on long-term liabilities, with a primary emphasis on bonds payable. This chapter guides students through the principles of issuing bonds, calculating interest expenses, amortizing bond premiums or discounts, and understanding the implications of bonds on financial

statements.

Why Mastering Chapter 13 Matters

- Practical Application: Bonds are a common financing method for corporations, making this knowledge highly relevant for future accountants and financial analysts.
- Conceptual Clarity: It bridges theoretical understanding with real-world accounting practices, including amortization methods and reporting.
- Exam Preparedness: Mastery of these exercises enhances readiness for exams, certifications, and professional audits.

Key Topics Covered in WileyPlus Chapter 13 Exercises

- Bond Issuance at Par, Premium, and Discount

Bond issuance can occur at face value, above (premium), or below (discount) the face amount. Understanding how to record and interpret these transactions is fundamental.

- At Par: When bonds are issued at their face value, the journal entry is straightforward.
- At Premium: Bonds issued above face value result in a premium, which must be amortized over the life of the bonds.
- At Discount: Bonds issued below face value create a discount, requiring amortization to reflect the true interest expense.

- Amortization of Bond Premiums and Discounts

The two main methods employed are:

- Effective Interest Method: Provides a more accurate reflection of interest expense over time by applying the market rate at issuance.
- Straight-Line Method: Simplifies calculations by evenly amortizing the premium or discount, though less precise.

Most exercises favor the effective interest method, aligning with GAAP standards.

- Reporting Bond-Related Items in Financial Statements

Understanding how bonds are presented in balance sheets and income statements is critical:

- Bonds payable are recorded as a liability.
- Premiums increase the carrying amount; discounts decrease it.
- Interest expense reflects the amortized amount over periods.

Navigating Common Challenges in WileyPlus Exercises

Challenge 1: Correctly Calculating Amortization

Many students struggle with determining the amortization amount for each period, especially when using the effective interest method. The key steps include:

- Calculating the interest expense: Carrying amount $\times$ market rate.
- Determining the cash interest paid: Face amount $\times$ coupon rate.
- Deriving the amortization amount: Interest expense - Cash interest paid.

Tip: Keep track of the bond's carrying amount after each period to ensure accuracy.

Challenge 2: Differentiating Between Premium and Discount Entries

Misclassification can lead to incorrect journal entries. Remember:

- Premiums increase the bond's carrying amount.
- Discounts decrease it.
- Expenses are affected accordingly over time through amortization.

Challenge 3: Timing and Pattern of Amortization

Understanding the schedule of amortization helps in predicting bond values at any point. Consistent application of the chosen amortization method ensures accurate reflection of bond liability over time.

Step-by-Step Approach to Solving WileyPlus Exercises

Step 1: Analyze the Information Provided

Identify:

- Bond face value
- Coupon interest rate
- Market interest rate
- Issue price
- Term of bonds
- Payment frequency

Step 2: Determine the Type of Issuance

Decide whether bonds are issued at par, premium, or discount based on the issue price relative to face value.

Step 3: Record the Initial Journal Entry

- For bonds issued at par: Debit Cash, Credit Bonds Payable.
- For bonds issued at premium: Debit Cash, Credit Bonds Payable and Premium on Bonds Payable.
- For bonds issued at discount: Debit Cash, Debit Discount on Bonds Payable, Credit Bonds Payable.

Step 4: Calculate Periodic Interest Payments and Interest Expense

- Use the coupon rate for cash interest.
- Apply the market rate for interest expense via the effective interest method.
- Amortize the premium or discount accordingly.

Step 5: Prepare Amortization Schedule

Create a table to track:

- Beginning carrying amount
- Interest expense
- Cash paid

Understanding the Scope of Chapter 4 in Intermediate Accounting

Key Topics Covered in Chapter 4

Chapter 4 generally focuses on:

- Recognition of revenue and the timing of revenue recognition
- Accounts receivable and their valuation
- Notes receivable and other receivables
- Accounts for uncollectible accounts and allowances for doubtful accounts
- Methods for estimating bad debts and receivables valuation
- Sale of receivables and factoring arrangements

These topics are integral to financial statement accuracy and compliance with accounting standards

such as GAAP and IFRS.

Common Problems and Solutions in Wiley Plus Chapter 4

Many students encounter similar challenges while working through Wiley Plus problems in Chapter 4. Here's a breakdown of typical questions and detailed solutions.

1. Recognizing Revenue at the Correct Point

Problem: A company delivers goods to a customer on March 15, but the payment is not received until April 10. When should the revenue be recognized?

Answer:

Under the revenue recognition principle, revenue should be recognized when it is earned and realizable, typically at the point of delivery if the risks and rewards transfer to the buyer.

In this case:

- Revenue is recognized on March 15, the delivery date, assuming the company has transferred control of the goods.
- The cash receipt on April 10 does not affect the recognition date but is recorded as accounts receivable until payment is received.

Wiley Plus Tips:

- Understand the criteria for revenue recognition under ASC 606.
- Recognize revenue when control passes, not necessarily when cash is received.

2. Calculating Allowance for Doubtful Accounts

Problem: A company has Accounts Receivable totaling \$500,000. Based on historical data, 2% of receivables are uncollectible. What is the journal entry to record the allowance?

Answer:

- Calculate the allowance: $2\% \text{ of } \$500,000 = \$10,000$
- Journal Entry:

- Debit: Bad Debt Expense \$10,000
- Credit: Allowance for Doubtful Accounts \$10,000

Wiley Plus Explanation:

- The allowance method estimates uncollectible accounts, matching expenses with revenues.
- This approach adheres to the matching principle and provides a realistic view of receivables' net realizable value.

3. Valuing Notes Receivable and Interest

Problem: A company holds a \$10,000, 6-month note with a 5% annual interest rate issued on January 1. What is the amount to be recorded on the balance sheet at inception? What interest revenue will be recognized at the end of six months?

Answer:

- At inception:
- Notes receivable recorded at face value: \$10,000
- Interest calculation:
- Interest = Principal $\times$ Rate $\times$ Time
- Interest = $\$10,000 \times 5\% \times (6/12) = \250

- At the end of six months:
- The interest revenue recognized is \$250, and the total amount receivable is \$10,250 (principal + interest).

Wiley Plus Tip:

- For notes, record the face value at inception.
- Recognize interest revenue periodically based on the effective interest method or straight-line method, depending on the context.

Wiley Plus offers numerous practice problems that mimic real exam questions. To maximize your learning:
