The area enclosed by the labia minora, containing the openings of the urethra and vagina, as well as the Bartholin's glands.

- Urethral Opening

An external opening for urine excretion, positioned just above the vaginal opening.

- Vaginal Opening (Introitus)

The entrance to the vaginal canal, which can vary from a small slit to a more open space, depending on individual anatomy and physiological states.

- Perineum

The area between the vaginal opening and the anus, often relevant in childbirth and medical procedures.

- Perianal Area

Surrounding the anus; important in understanding anatomy for surgical and medical contexts.
