It is designed to assess the breadth of knowledge necessary for safe and effective practice, emphasizing both theoretical understanding and clinical reasoning. The exam is typically held twice annually and is conducted in multiple formats, including written papers and, increasingly, computer-based testing.

Overall Structure of the Examination

The Part 1 MRCOG examination primarily comprises multiple-choice questions (MCQs). Recent reforms and updates aim to align the assessment more closely with clinical practice, ensuring that successful candidates possess a solid foundation of essential knowledge.

Key features of the current format include:

- Number of Papers: Usually one or two written papers, depending on the exam cycle and format updates.
- Question Types: Primarily Single Best Answer (SBA) MCQs, with some Extended Matching Questions (EMQs).
- Question Content: Broad coverage of obstetrics, gynecology, reproductive medicine, and basic sciences.
- Duration: Approximately 3 hours per paper, with separate sessions for each.

Detailed Breakdown of the Exam Format

1. Single Best Answer (SBA) Multiple Choice Questions

The SBA format is the cornerstone of the Part 1 MRCOG exam. Candidates are presented with a clinical scenario or stem, followed by a question and several options. The task is to select the single most appropriate answer.

Characteristics of SBA questions:

- Scenario-based: Often rooted in real-world clinical situations.
- Options: Usually 5 options labeled A-E.
- Focus: Knowledge application, clinical reasoning, and decision-making.
- Question Types: Can include diagnosis, management, interpretation of investigations, or understanding of pathophysiology.

Sample structure:

> A 28-year-old woman presents with irregular menses and hirsutism. Laboratory tests reveal elevated testosterone levels. Which of the following is the most likely diagnosis?

Options:

- A) Polycystic ovary syndrome
- B) Congenital adrenal hyperplasia
- C) Ovarian tumor
- D) Thyroid dysfunction
- E) Cushing's syndrome

Correct answer: A) Polycystic ovary syndrome

2. Extended Matching Questions (EMQs)

Though less prevalent, EMQs test candidates' ability to differentiate between multiple options across a series of related questions.

Features:

- Sets of options: A list of 10-15 options, such as diseases or medications.
- Multiple vignettes: Each question presents a clinical scenario requiring the candidate to select the most appropriate match from the options.
- Purpose: To assess pattern recognition and diagnostic reasoning.

Example:

Match each clinical case to the most appropriate management approach from the list provided.

Content Domains Covered in the Examination

The Part 1 MRCOG emphasizes foundational knowledge across several domains:

- Basic Sciences: Anatomy, physiology, biochemistry, genetics, and histology relevant to obstetrics and gynecology.
- Obstetrics: Antenatal care, labor management, fetal monitoring, complications, and obstetric emergencies.
- Gynaecology: Menstrual disorders, infertility, benign and malignant gynaecological conditions.
- Reproductive Medicine: Assisted conception, contraception, menopause.
- Ethics and Professionalism: Principles guiding clinical practice, consent, confidentiality, and medico-legal aspects.

Exam Question Distribution and Weighting

While the exact distribution can vary, the exam typically allocates questions proportionally to reflect the importance of each domain:

| Domain | Approximate Percentage of Questions | Key Topics |

|---|---|---|

- | Basic Sciences | 20-25% | Anatomy, physiology, genetics, histology |
- | Obstetrics | 35-40% | Antenatal care, labor, emergencies, fetal monitoring |
- | Gynaecology | 25-30% | Menstrual disorders, pelvic masses, cancers |
- | Reproductive Medicine | 10-15% | Infertility, contraception, menopause |
- | Ethics & Professional Practice | 5-10% | Consent, medico-legal issues, professionalism |

Understanding this distribution aids in effective study planning.
