Economic Equivalence and Comparison

Techniques to compare alternative projects or methods include:

- Net Present Value (NPV)
- Benefit-Cost Ratio (BCR)
- Internal Rate of Return (IRR)
- Payback period

Solutions to Common Engineering Economics Problems

Step-by-Step Approach

Riggs advocates a systematic problem-solving approach:

- Identify the problem clearly and define knowns and unknowns.
- Gather data, including Canadian economic factors such as inflation rates, interest rates, and currency considerations.
- Select the appropriate method (e.g., NPV, IRR).
- Perform calculations using formulas and tables provided.
- Interpret results in the context of project feasibility.
- Make recommendations based on economic analysis.

Example Problem and Solution

Suppose an engineering firm in Canada is evaluating two options for replacing equipment:

- Option A: Continue operating existing equipment with ongoing maintenance costs.
- Option B: Purchase new equipment with higher initial cost but lower operating costs.

Solution Steps:

- Step 1: Gather data?initial cost, operating costs, salvage value, project life, discount rate.
- Step 2: Calculate the present worth of costs for both options over the project life.
- Step 3: Compare the present worths; the lower cost indicates a better investment.
- Step 4: Consider qualitative factors and risk.

Using Canadian interest rates and local cost data ensures the solution's relevance.

Canadian-Specific Considerations in Engineering Economics

Currency and Inflation

- Use of the Canadian dollar (CAD) throughout calculations.
- Adjustment of cash flows for inflation using Canadian Consumer Price Index (CPI).
- Incorporating Canadian interest rates, which can be obtained from Bank of Canada data.

Taxation and Depreciation

- Canadian tax regulations influence project cash flows.
- Calculation of after-tax cash flows considering:

- Capital Cost Allowance (CCA)
- Income tax rates
- Tax credits

- Depreciation methods like straight-line and declining balance are discussed with Canadian context.
